this type of submission will be made subject to a special fast procedure and will only take place if the following conditions are met:

T. Heskes,
Editor-in-Chief
Neurocomputing
Neurocomputing Letters
Editorial board
L.C. Jain,
Editor for Brief Papers and Short Communications (Letters)

• revised versions of rejected manuscripts may only be resubmitted as a regular paper. The resubmission must include copies of the original referees’ comments and separate pages with the authors’ response to all these comments.

• upon acceptance of the letter, publication will take place in the first available issue of the journal, within approximately the next 3 to 4 months.

• the Letter shall be either accepted or rejected. By acceptance, the only possibility is one with minor corrections.

• the author can expect a review report on his/her letter within eight (8) weeks after submission,

• Content: about a new development, which is served by rapid publication, relevant comments on articles published in the journal, or about outstanding preliminary results of current research.

The Letters Editor will determine whether the submitted manuscript meets all requirements for a letter submission and is in charge of the complete review procedure. If all requirements are met, the Letters Editor will make the submission subject to a special, rapid procedure:

Author’s instructions for regular papers and further information on the Letters section can be found on the inside back cover.
