

# Lorenzo Mari – Curriculum vitæ

## Personal information

Name / Surname	Lorenzo Mari
Address	Dipartimento di Elettronica, Informazione e Bioingegneria (DEIB) Politecnico di Milano (PoliMi) Via Ponzio 34/5, Milano 20133, Italy
Telephone	+39.02.2399.3562
Fax	+39.02.2399.3412
Email	<a href="mailto:lorenzo.mari@polimi.it">lorenzo.mari@polimi.it</a>
Web site	<a href="http://home.deib.polimi.it/mari/">http://home.deib.polimi.it/mari/</a>
Nationality	Italian
Date of birth	May 22, 1981
Current position	<i>Postdoctoral Research Associate</i> , DEIB, PoliMi <i>Contract Professor</i> , PoliMi — Ecology and Sustainability, General Ecology, Geo Fundamentals National Scientific Qualification for Associate Professorship in Ecology in Italian Universities

## Research statement

Research interests	As an environmental engineer with a PhD in information technology, I am deeply interested in the analysis of ecological and environmental processes by means of quantitative tools. My research activity is mainly devoted to the study of spatiotemporal dynamics in ecology and epidemiology by means of simple (whenever possible) yet rigorous mechanistic models. Over the last years I have become more and more involved in the emerging field of ecohydrology, an interdisciplinary discipline aimed at studying the interactions between water and ecosystems.
Research activities	Examples of problems I have recently analyzed – or I am still struggling with – are: the persistence of metapopulations in river networks; the dynamics of waterborne disease epidemics (cholera and schistosomiasis in particular) and the role of human mobility in promoting their spatial diffusion; the population dynamics of freshwater invasive species and their spread over hydrological networks; the interaction between hydrodynamics and the ecology of species with pelagic developmental stages by means of computationally intensive simulations; the biodiversity patterns of complex, spatially explicit environments; the influence of seed foragers' movement strategies on the formation of vegetation patterns. In addition to scientific relevance, some of these topics have clear social and/or economic implications. This is the case, for instance, of building models for cholera epidemics (like the one that stroke Haiti in 2010 and has been responsible for more than 750,000 cases and 9,000 casualties to date) or parasitic infections (like schistosomiasis, which affects more than 250 million people worldwide, especially in developing countries), as well as for the spread of alien invasive species (like the zebra mussel, which has been spreading in North American freshwaters for the past 25 years causing huge ecological and economic impacts). Mathematical models of disease ecology and biological invasions are key tools to understand drivers and controls of their spread, and to design effective control measures.
Current research and perspectives	I am currently working on coupled physical-biological models to study the dispersal patterns of pelagic species in the Mediterranean Sea and the Pacific Ocean. Aim of the research is to understand the large-scale implications of connectivity for population ecology, conservation and management. I also continue working on waterborne disease dynamics. In particular, I am interested in the definition of formal conditions for pathogen epidemicity and endemicity, explicitly accounting for realistic environmental settings and for the interplay between epidemiological and ecological dynamics. The modeling tools developed for these two research lines (namely, computationally intensive individual-based simulations and stability analysis of large-scale spatially explicit systems) can be applied to a variety of problems that are crucial to conservation ecology like, for instance, the definition of persistence criteria for populations living in fragmented landscapes, dendritic networks or webs of marine protected areas, or the derivation of invasibility/persistence conditions for alien species or agricultural pests.

## Employment

Oct 2014 – Apr 2012 – Sept 2014	Postdoctoral Research Associate, DEIB, PoliMi Postdoctoral Research Associate, Laboratoire d’Ecohydrologie (ECHO), Ecole Polytechnique Fédérale de Lausanne (EPFL)
Jan 2012 – Jan 2014	Postdoctoral Research Associate, DEIB, PoliMi
Jul 2009 – Dec 2011	Postdoctoral Research Associate, ECHO, EPFL
Jan 2009 – Jul 2009	Temporary Research Associate, DEIB, PoliMi

## Education

Jan 2006 – Dec 2008	<b>Cursus studiorum</b> PhD, Information Technology, DEIB, PoliMi. Advisor: Prof. R. Casagrandi (DEIB, PoliMi). Tutor: Prof. C. Piccardi (DEIB, PoliMi). Degree awarded <i>with merit</i> on April 3 2009. Major research: “Models for movement ecology”. Advisor: Prof. R. Casagrandi; co-advisor: Prof. M. Gatto (DEIB, PoliMi). Part of the research work has been published in <i>Freshwater Biology</i> [a1], <i>The American Naturalist</i> [a3], <i>Ecohydrology</i> [a5] and <i>Theoretical Population Biology</i> [a6]. Minor research: “The impact of hydrodynamics on the spatial distribution of an aquatic species: a numerical study”. Advisor: Prof. L. Bonaventura (MOX Laboratorio di Modellistica e Calcolo Scientifico, Dipartimento di Matematica “F. Brioschi”, PoliMi). The results of the minor research have been published in <i>Ecological Modelling</i> [a4].
Oct 2003 – Oct 2005	MSc, Environmental and Land Engineering, I Facoltà di Ingegneria, PoliMi Thesis title: “Modelli spazialmente espliciti per la dinamica di popolazioni animali: la determinazione genetica del rapporto sessi” ( <i>Spatially explicit models for the dynamics of animal populations: the genetic determination of the sex ratio</i> ). Advisor: Prof. M. Gatto; co-advisor: Prof. R. Casagrandi. Mark: 110/110 <i>cum laude</i> . The thesis has been awarded the CIRITA 2006 prize. Part of the work has been published on <i>Mathematical Biosciences and Engineering</i> [a2].
Sept 2000 – Oct 2003	BSc, Environmental and Land Engineering, I Facoltà di Ingegneria, PoliMi Thesis title: “Ruolo di sostanze tossiche in un modello di competizione algale” ( <i>Role of toxicants in a model of algal competition</i> ). Advisor: Prof. A. Gragnani (DEIB, PoliMi). Mark: 103/110

### Visiting positions

Sept – Dec 2007	Visiting research collaborator at Prof. S.A. Levin’s Theoretical Ecology Lab, Department of Ecology and Evolutionary Biology, Princeton University (NJ)
Mar 2006	Visiting at Prof. R. Nathan’s Movement Ecology Lab, Department of Evolution, Systematics and Ecology, Hebrew University of Jerusalem (Israel)

## Awards

July 2016	Polisocial Award, PoliMi
April 2015	D4D Health Prize, Data for Development Challenge, Orange
Sept 2014	Young Researchers’ Award, Società Italiana di Ecologia (SIte)
Nov 2012	Fondo Rotary Research Prize, Rotary Club Como
Sept 2008	Marchetti Prize for young researchers in Ecology, SIte, as coauthor of the paper “Will the zebra mussel ( <i>Dreissena polymorpha</i> ) reach Florence along the Arno River? Results from a mechanistic network model”, XVIII Congresso della SIte
Nov 2006	CIRITA (Centro Interdipartimentale di Ricerca in Informatica per il Territorio e l’Ambiente, PoliMi) Prize for the MSc Thesis “Modelli spazialmente espliciti per la dinamica di popolazioni animali: la determinazione genetica del rapporto sessi”

## Publications

### Journal articles

Number of articles: 41

Total impact factor (IF): 171.487

Average IF: 4.635

Total citations (Cit): 350/393/562 (Web of Science / Scopus / Google Scholar)

- [o06] **L. Mari** (2009)  
Models for Movement Ecology  
PhD thesis in Information Technology, PoliMi, A.Y. 2008/2009.  
Advisor: Prof. R. Casagrandi; co-advisor: Prof. M. Gatto

- [o05] L. Bonaventura, C. Biotto, A. Decoene, **L. Mari**, E. Miglio (2009)  
A coupled biological and hydrodynamic model for the spatial distribution of aquatic species in thermally forced basins  
MOX Report 2009.2, Dipartimento di Matematica “F. Brioschi”, PoliMi
- [o04] **L. Mari**, R. Casagrandi, M. Gatto (2008)  
A model for the spread of the zebra mussel (*Dreissena polymorpha*) on the Arno River  
PhDAY, June 26 2008, DEIB, PoliMi. Best paper candidate
- [o03] **L. Mari**, L. Bonaventura (2007)  
The impact of hydrodynamics on the spatial distribution of an aquatic species: a numerical study  
Internal report 2007.60, DEIB, PoliMi
- [o02] **L. Mari** (2005)  
Modelli spazialmente espliciti per la dinamica di popolazioni animali: la determinazione genetica del rapporto sessi  
MSc thesis in Environmental Engineering, PoliMi, A.Y. 2004/2005  
Advisor: Prof. M. Gatto; co-advisor: Prof. R. Casagrandi
- [o01] **L. Mari** (2003)  
Ruolo di sostanze tossiche in un modello di competizione algale  
BSc thesis in Environmental Engineering, PoliMi, A.Y. 2002/2003  
Advisor: Prof. A. Gagnani

## Involvement in research programs

- 2017 – Project manager for the project “MApping Schistosomiasis Transmission Risk in Saint-Louis, Senegal (MASTR-SLS)” (Polisocial Award, principal investigator: Prof. R. Casagrandi)
- 2016 – Project “Improving future ecosystem benefits through earth observation (ECOPOTENTIAL)” (European Commission H2020, principal investigator: Prof. A. Provenzale, Consiglio Nazionale delle Ricerche), PoliMi research unit (principal investigators: Prof. R. Casagrandi and Prof. M. Gatto)
- 2015 – 2016 Project “Uncovering the impact of human mobility on schistosomiasis via mobile phone data” (Bill & Melinda Gates Foundation, principal investigator: Prof. M. Gatto)
- 2014 – 2015 Project “Towards coast to coast networks of marine protected areas (COCONET)” (European Commission FP7, principal investigator: Prof. F. Boero, Università del Salento), CoN-ISMa/PoliMi research unit (principal investigator: Prof. M. Gatto)
- 2014 Project “Temperature driven emergence of Proliferative Kidney Disease in salmonid fish” (SNSF, principal investigator: Dr. H. Hartikainen), EPFL research unit (principal investigator: Prof. A. Rinaldo, ECHO/EPFL)
- 2014 Project “Santé des populations: maladies d’origine hydrique” (Swiss Agency for Development and Cooperation, principal investigator: Prof. A. Rinaldo)
- 2012 – 2014 Project “Dynamics and controls of large-scale cholera outbreaks (DYCHO)” (SNSF project 138104, principal investigator: Prof. A. Rinaldo)
- 2012 – 2013 Project “Climate Change Assessment in Small Pacific Islands States” (Comune di Milano, principal investigator: Prof. R. Casagrandi)
- 2009 – 2013 Project “River networks as ecological corridors for biodiversity, populations and waterborne disease (RINEC)” (ERC project 227612, principal investigator: Prof. A. Rinaldo)
- 2009 – 2013 Project “Hydrologic controls on ecological processes: river networks as corridors for biodiversity, populations and pathogens of water-borne diseases” (SNSF project 124930, principal investigator: Prof. A. Rinaldo)

2007 Project “Internazionalizzazione del Sistema Universitario” (Interlink II O4 CE 4968, MIUR), PoliMi research unit (“Conseguenze ed impatti dei cambiamenti climatici globali sulla gestione e conservazione delle risorse naturali”); principal investigator: Prof. M. Gatto)

2006–2007 Project “Reti autorganizzanti di tipo cellulare e dinamiche non lineari caotiche per la modellizzazione ed il controllo di sistemi complessi” (FIRB2001-RBNE01CW3M, MIUR); principal investigator: Prof. L. Fortuna, Università degli Studi di Catania), PoliMi research unit (“Reti dinamiche non lineari: analisi e applicazioni”); principal investigator: Prof. S. Rinaldi, DEIB, PoliMi)

### Invited seminars, talks and workshops

May 2017 Disease dynamics on river and human mobility networks: implications for control NIMBioS workshop on optimal control of NTDs, University of Tennessee (Knoxville TN, US)

Jan 2017 Spatially explicit modeling of schistosomiasis transmission dynamic. PoliMi (Milano, Italy)

Jan 2016 Modeling cholera epidemics: theoretical approach and real-world applications. PoliMi (Milano, Italy)

April 2015 Uncovering the impact of human mobility on schistosomiasis via mobile phone data. NetMob 2015, Massachusetts Institute of Technology (Cambridge MA, US)

Jan 2015 Spatially explicit models for schistosomiasis transmission. Hopkins Marine Station of Stanford University (Pacific Grove CA, US)

Jun 2014 Ecohydrological modeling and waterborne disease epidemics. NIMBioS investigative workshop on leptospirosis modeling, University of Tennessee (Knoxville TN, US)

Dec 2013 The spread of the invasive species *Dreissena polymorpha* along river networks. Università degli Studi di Milano (Milano, Italy)

Nov 2011 Drivers and controls of the zebra mussel invasion of the Mississippi-Missouri river system. Eawag (Dübendorf, Switzerland)

Dec 2008 Bifurcation and chaos in a demographic model for the dynamics of the zebra mussel *Dreissena polymorpha*. PoliMi (Milano, Italy)

Apr 2007 On the role of toxicants in a model for algal competition. PoliMi (Milano, Italy)

May 2006 A demographic model for *Dreissena polymorpha*: local dynamics, prediction and control. PoliMi (Milano, Italy)

### Teaching activities

#### As lecturer

Academic Year 2016–2017 “Geo Fundamentals 1” (5 credits)  
Master Degree in Geoinformatics, PoliMi  
“General Ecology” (4 credits)  
Master Degree in Sustainable Architecture and Landscape Design, PoliMi (Campus Piacenza)

A.Y.’s 2014–2016 “Ecology and Sustainability” (6 credits)  
Master Degree in Environmental Engineering, PoliMi (Campus Como)

A.Y.’s 2012–2014 “Ecology and Sustainability” (6 credits)  
Master Degree in Environmental Engineering, PoliMi (Campus Como)  
“Analisi dei Sistemi II” (5 credits)  
Bachelor Degree in Environmental Engineering, PoliMi (Campus Como)

A.Y. 2011–2012 “Conservation Ecology and Sustainability” (6 credits)  
Master Degree in Environmental Engineering, PoliMi (Campus Como)

### **As teaching assistant**

A.Y. 2014–2015	“Global Change and sustainability”, Alta Scuola Politecnica (4 hours)
A.Y. 2013–2014	“Water Resources Engineering”, Prof. A. Rinaldo (20 hours) Master Degree in Environmental Sciences and Engineering, EPFL “Global Change and sustainability”, Alta Scuola Politecnica (4 hours)
A.Y. 2012–2013	“Water Resources Engineering”, Prof. A. Rinaldo (20 hours) Master Degree in Environmental Sciences and Engineering, EPFL “Ecologia”, Prof. R. Casagrandi (10 hours) Corso di Laurea in Ingegneria per l’Ambiente e il Territorio, PoliMi “Global Change and sustainability”, Alta Scuola Politecnica (4 hours)
A.Y. 2011–2012	“Conservazione e Gestione degli Ecosistemi”, Prof. M. Gatto (20 hours) Corso di Laurea Magistrale in Ingegneria per l’Ambiente e il Territorio, PoliMi “Water Resources Engineering”, Prof. A. Rinaldo (20 hours) Master Degree in Environmental Sciences and Engineering, EPFL
A.Y.’s 2009–2011	“Water Resources Engineering”, Prof. A. Rinaldo (20 hours) Master Degree in Environmental Sciences and Engineering, EPFL
A.Y. 2008–2009	“Modelling and Simulation”, Prof. G. Guariso (DEIB, PoliMi) (40 hours) Master Degree in Environmental Engineering, PoliMi (Campus Como) “Ecologia 1”, Prof. R. Casagrandi (20 hours) Corso di Laurea in Ingegneria per l’Ambiente e il Territorio, PoliMi (Campus Como) “Ecology 2”, Prof. R. Casagrandi (4 hours) Master Degree in Environmental Engineering, PoliMi (Campus Como) “Global Change and sustainability”, Alta Scuola Politecnica (4 hours) “Modellistica e Controllo dei Sistemi Ambientali 1”, Prof. A. Gragnani (4 hours) Corso di Laurea in Ingegneria per l’Ambiente e il Territorio, PoliMi “Modellistica e Controllo dei Sistemi Ambientali 2”, Prof. A. Gragnani (4 hours) Corso di Laurea Magistrale in Ingegneria per l’Ambiente e il Territorio, PoliMi
A.Y. 2006–2007	“Ecologia 1”, Prof. R. Casagrandi (20 hours) Corso di Laurea in Ingegneria per l’Ambiente e il Territorio, PoliMi (Campus Como) “Ecologia 1 con Laboratorio”, Prof. M. Gatto (5 hours) Corso di Laurea in Ingegneria per l’Ambiente e il Territorio, PoliMi
<b>Other teaching activities</b>	
2017	“Analysis of Complex Networks: Theory and Applications”, Prof. C. Piccardi (lecturer, 2 hours) PhD Program in Information Technology, DEIB, PoliMi
2013	“Spatial Dynamics in Biology”, Prof. M. Gatto (lecturer, 2 hours) PhD Program in Information Technology, DEIB, PoliMi
2011	“Spatial Dynamics in Biology”, Prof. M. Gatto (lecturer, 2 hours) PhD Program in Information Technology, DEIB, PoliMi
2009–2014	Co-advisor of MSc theses, Master Degree in Environmental Sciences and Engineering, EPFL
2008	“Ecologia 1 con Laboratorio”, Prof. M. Gatto (lab tutor, 20 hours) Corso di Laurea in Ingegneria per l’Ambiente e il Territorio, PoliMi
2006–	Co-advisor of BSc and MSc theses, Corso di Laurea (Magistrale) in Ingegneria per l’Ambiente e il Territorio, PoliMi

## Academic service

- 2016– Guest Editor for the Special Issue “Hydrology, water resources and the epidemiology of water-related diseases”, *Advances in Water Resources* (<http://www.journals.elsevier.com/advances-in-water-resources/call-for-papers/special-issue-call-for-papers-hydrology-water-resources-and/>)
- 2009 – Acting as reviewer for *Advances in Water Resources*, *Annals of Epidemiology*, *Applied Mathematical Modelling*, *Applied Mathematics and Computation*, *Aquatic Invasions*, *Computer Methods and Programs in Biomedicine*, *Communications in Nonlinear Science and Numerical Simulation*, *Continental Shelf Research*, *Discrete Dynamics in Nature and Society*, *Ecological Modelling*, *Ecology Letters*, *Epidemiology*, *Environmental Modelling and Software*, *Freshwater Biology*, *Freshwater Science*, *Fundamental and Applied Limnology*, *Journal of Animal Ecology*, *Journal of Biological Dynamics*, *Journal of Ecology*, *Journal of Neuroinfectious Diseases*, *Journal of Statistical Mechanics*, *Journal of Theoretical Biology*, *Mathematics and Computers in Simulation*, *Methods in Ecology and Evolution*, *PLoS Neglected Tropical Diseases*, *Risk Management and Healthcare Policy*, *Public Health*, *Water Policy*, *Water Resources Research*, the Fulbright Commission, and the US National Science Foundation

## Scientific membership

- 2010–2012 Member of the American Geophysical Society (AGU) and European Geosciences Society (EGU)
- 2008 Member of the European Association of Environmental and Resource Economists (EAERE)
- 2006– Member of the SIte

Milano, May 12, 2017

Lorenzo Mari
