

Raffaella Mirandola: curriculum vitæ et studiorum

Name Raffaella Mirandola
Institution Politecnico di Milano, Dipartimento di Elettronica, Informazione e Bioingegneria
E-mail raffaella.mirandola@polimi.it
Web page <http://home.deib.polimi.it/mirandola/>

EDUCATION

- Ph.D. in Computer Science, University of Roma Tor Vergata, Italy, 1994.
- M.Sc. in Computer Science University of Pisa, Italy, 1989.

ACADEMIC EXPERIENCE

I am Associate Professor at Dipartimento di Elettronica, Informazione e Bioingegneria, Politecnico di Milano. I annually teach basic and advanced courses on software engineering and on computer systems. I am an active member of the scientific community and I regularly serve in international program committees and as a referee for top-ranked journals. I'm a member of the editorial board of the Journal of System and Software (Elsevier). I also organized several international conferences and workshops as Program Chair or General Chair and co-organized two Dagstuhl Seminars.

RESEARCH AREAS

My main research interests are in:

- Software quality requirements modeling, analysis and verification
- Formal methods for (self-)adaptive dependable IT systems
- Model- driven software engineering

and the application of the theories, approaches and techniques specific to the above research areas to *service-oriented* and *component-based* systems, *adaptive systems*, *mobile systems*, and *cloud computing*. My research has been funded by several national and international projects, among which the FP7 European project Q-ImPrESS: Quality Impact Prediction for Evolving Service-Oriented Software, for which I was Scientific Responsible and also local responsible for Politecnico.

SCIENTIFIC RESULTS

- Co-author of 22 top-ranked journal publications;
 - Co-author of 12 chapters in scientific books;
 - Co-author of 77 scientific publications on peer-reviewed conferences/workshops (with one Best Paper Award).
 - Based on Google Scholar (20/12/2013), my h-index is 26 with 2690 as a total number of citations.
- Specifically, the research result concerning the definition and generation of quality models at design time, with the definition of PRIMA-UML represents a seminal work in this area, widely cited in the reading list of academic courses and in the literature, see for example the citations of Google Scholar for the *WOSP paper* [IC.60] and the *Science of Computer Programming paper* [JR.19]. A recent research contribution concerns the definition of formal models at runtime and their usage in the area of service-oriented application. The obtained results are widely cited in the literature, see for for example the citations of Google Scholar for the *ICSE paper* [IC.30], the *IEEE Transaction on Software Engineering paper* [JR.13] and the *Communication of the ACM paper* [JR.9]. A different contribution in the area of Model Driven Engineering has been the definition of the pivot language KLAPER, which is widely cited in the literature, see for example the citations of Google Scholar for the *Journal of System and Software paper* [JR.16].

Position and Education

RECORD OF EMPLOYMENT

August 2011 – present

Associate Professor at Dipartimento di Elettronica, Informazione e Bioingegneria, Politecnico di Milano

November 2005 – July 2011

Assistant Professor at Dipartimento di Elettronica e Informazione, Politecnico di Milano

November 1997 – October 2005

Assistant Professor at the Computer Science Department, University of Rome Tor Vergata

November 1995 – October 1997

Post-Doc Fellow at the Computer Science Department, University of Rome Tor Vergata

EDUCATION

- Ph.D. in Computer Science, University of Roma Tor Vergata, Italy, 1994.
Title: *Hierarchical models for performance evaluation of computer and communication systems*
- M.Sc. in Computer Science University of Pisa, Italy, 1989.
(Thesis title: *Hybrid simulation and variance reduction methods for performance evaluation of queueing network models*)

Research interests

My main research interests are in:

- Software quality requirements modeling, analysis and verification
- Formal methods for (self-)adaptive dependable IT systems
- Model- driven software engineering

and the application of the theories, approaches and techniques specific to the above research areas to *service-oriented* and *component-based* systems, *adaptive systems*, *mobile systems*, and *cloud computing*.

SOFTWARE QUALITY REQUIREMENTS MODELING, ANALYSIS AND VERIFICATION

A key requirement for software is becoming the capability to keep providing the required quality of service (QoS), in terms of performance, dependability and operating cost (e.g., energy consumption). To this end, quality goals must be carefully and continuously pursued throughout the lifecycle, and especially from its very beginning. Indeed, if unacceptable qualities are discovered late in the project, it is necessary to either abandon the system entirely or go back through redefinition, redesign and redevelopment phases until the system becomes acceptable. Both options are clearly much more expensive than meeting the quality goals since the initial stages. For these reasons the research has been directed to the (automatic) generation and use of software quality models in a continuous way starting from design time until runtime.

Scientific contributions A first research area has been the definition and generation of quality models at design time, with the definition of PRIMA-UML [IC.60], [IC.59], [JR.19] for example, which represents a seminal work in this area widely cited in the reading list of academic courses and in the literature, see for example the citations of Google Scholar for the **WOSP paper** [IC.60], and the **Science of Computer Programming** journal [JR.19]). These methods have been applied to the domain of mobile software architectures and the results presented in [IC.56] and in the **IEEE Transaction on Mobile Computing** [JR.17].

For component-based systems we have been working at a general framework for enabling the early validation of component-based systems on the basis of the architectural specification. We started with a survey on existing methods for the quality analysis of component-based systems presented in [IB.10]. Then, the definition of the Component-Based Software Performance Engineering (CB-SPE) [IC.50], [IC.52], [IC.51], [IC.41] [WS.12], [OJ.4] has been one of the result of this work, which is widely cited in the literature (see for example the citations of Google Scholar for the CBSE [IC.50]). In this context, a common component modeling example has been produced and presented in the **Springer Book** [BK.1], to provide a common case study to be used as a basis for comparisons of different approaches. Different techniques based on optimization methods have been investigated and presented in [IC.26] and in two journal papers [JR.14], [JR.8] published on **Journal of Systems and Software**.

Another result concerns the definition and analysis of different kind of failures that can affect the overall system behavior [IC.23], [IC.20], [IC.5], and in the **Transactions on Reliability** journal [JR.1]. The paper [IC.23] received the **best paper award** at the CBSE conference.

More recent research contributions have been in the definition of models at runtime (presented at **ICSE Conference** [IC.30]) and their usage in the area of service-oriented application, presented in [IC.38], [IC.29], [IC.28], [IC.32], [IC.8], [IC.7], and in the **IEEE Transactions on Software Engineering** journals [JR.13], [JR.12]. The obtained results are widely cited in the literature, see for example the citations of Google Scholar for the **ICSE paper** [IC.30], the **ESEC/FSE paper** [IC.28], and the **IEEE Transactions on Software Engineering** [JR.13].

FORMAL METHODS FOR (SELF-)ADAPTIVE DEPENDABLE IT SYSTEMS

In modern software applications, two requirements are becoming common: software must adapt continuously, to respond to changes in application objectives and in the environment in which it is embedded, and it is expected to fulfil is dependability. To this end the seamless use of *formal verification techniques* preventing errors from reaching the final implementation (or at least removing them when a new version of the software is deployed) has been proved to be a feasible way to reach these goals.

Scientific contributions In this area, the main contributions concern the definition of an overall framework promoting the use of quantitative formal techniques at runtime presented in [IB.3] and in the **Communication of ACM** [JR.9], as well as a set of specific techniques proposing the use of formal methods to deal with adaptable dependable systems. Specifically, Petri Nets and Queuing Networks have been applied to plan system adaptation while minimizing the energy consumption, in **Journal of Systems and Software** [JR.10], in **Sustainable Computing, Informatics and Systems** [JR.7] and in **International Journal of Performability Engineering** [OJ.1] respectively. Petri Nets have also been applied to devise the most suitable number of resources to be used when the workload of the application presents some burstiness [IC.11]. Another formalism, the Abstract State Machine (ASM), has been extended to deal with reliability analysis in [IC.9] and in the **Journal of System and Software** paper [JR.2] providing a unique component model, that is both the design oriented model of the component assembly and the formal analysis-oriented model that leads the reliability analysis. The combined use of optimization techniques and design patterns and tactics have been exploited to explore the state space adaptation of service oriented applications in [IC.17] and in the **Science of Computer Programming** journal [JR.5]. The research challenges and possible research directions in this field have been explored in [IB.6] and [IB.1]. Some of these topics, concerning the definition of metrics for system adaptabil-

ity and the definition of different types of uncertainties are presented in the journal paper [JR.6] (**Journal of Systems and Software**) and in the conference paper [IC.4], respectively.

MODEL- DRIVEN SOFTWARE ENGINEERING

Model-driven development (MDD) is a discipline that tries to systematize model-based software development. The goal of MDD is twofold. On the one side, it aims at deriving (automatically or semi-automatically) a software implementation, starting from high-level models of the system and applying model transformation rules which refine high-level descriptions into more concrete and specific models. On the other, it aims at supporting reasoning activities on the high-level models. Through an early analysis of quality properties, such as performance and reliability, the software engineer can evaluate the impact of the different design choices or candidate system architectures, before they are reified into runnable code.

Scientific contributions A first research contribution in this area is the definition of an UML profile for mobile software architectures and its usage for the analysis of quality requirements: [IC.58], [IC.49] and [IC.48]. Another result concerns the definition of a pivot language called KLAPER facilitating the definition and generation of analysis- oriented models (such as reliability models or performance models) starting from design-oriented models expressed in different formalisms, such as UML or BPMN, [IC.44],[IC.40],[JR.16],[IB.8], together with the possibility to deal with dynamic system environments [IC.39] and [IB.7]. A tool-suite has been built around this language and used in a set of academic and industrial case studies presented at the conferences [IC.19] (**TOOLS2011**, [IC.18] (**ICSE2011**)) and in the **Software and System Modeling** journal [JR.4]. The obtained results are widely cited in the literature, see for example the citations of Google Scholar for the WOSP paper [IC.44] and the **Journal of Systems and Software** paper [JR.16].

A different challenging problem we have considered in the MDE area is called "feedback provisioning": how to propose solutions to non-experienced engineers and guide them in the selection of an appropriate one when issues concerning quality attributes are detected. In this context we have presented a general discussion of challenges and open issues [IC.10], we have proposed a multi-modeling solution that leverages and extends existing model transformation techniques with constructs to elicit the space of the alternative solutions and to bind quality properties to them, presented at **MODELS2011** conference [IC.16] and in the **Computer Science - Research and Development** journal [JR.11]. The model transformations themselves need to be verified and a testing technique has been proposed to this end in the **QUATIC2010** conference paper [IC.25] and in the **Innovations in Systems and Software Engineering** journal paper [JR.3].

INVITED TALKS

- "Software Performance Engineering In and For Dynamic Environments, Keynote at ECSA 2011, Essen Germany, September 2011 (<http://www.ecsa2011.org/>)
- A journey across three decades of software performance engineering approaches Keynote at PalladioDays 2011, Karlsruhe, Germany November 2011 (<http://www.palladio-days.org/2011/programme/>)
- Software Performance Engineering In and For Dynamic Environments Seminar at Milano Bicocca, PhD Course, 2 December 2011
- Tecniche di valutazione di requisiti di performance e reliability per il software, Invited talk, Workshop CDE V&V Intecs, 25 November 2011
- Some issues about modeling of mobile software architecture, Invited presentation at UML 2004 Workshop on Software Architecture Description and UML, 12 October 2004

TUTORIALS

- “Performance Validation of mobile software architecture” at PERFORMANCE 2002 IFIP WG 7.3 International Symposium on Computer Performance Modeling, Measurement and Evaluation, Roma, Italy, September 2002 (with V. Cortellessa and V. Grassi)
- “Performance Validation of mobile software architecture” at the Fourth International Workshop on Software and Performance, WOSP 2004, ACM, January 14-16 2004, Redwood Shores, CA, USA (with V. Cortellessa and V. Grassi)

Professional Activities

EUROPEAN RESEARCH PROJECTS

Scientific responsible and local responsible for Politecnico

- FP7 European project Q-ImPrESS: Quality Impact Prediction for Evolving Service-Oriented Software (2008-2011)

I contributed actively in the following research projects:

- FP7 ICT SeaClouds: Seamless adaptive multi-cloud management of service-based applications (30 months)
- FP7 ERC-SMSCom: Self-Managing Situated Computing (60 months)
- FP7 NOE S-Cube: Software Services and Systems Network (48 months)
- FP6 ICT PLASTIC: Providing Lightweight and Adaptable Service Technology for pervasive Information and Communication (36 months)
- FP6-ICT CASCADAS: Component-ware for Autonomic Situation-aware Communications, and Dynamically Adaptable Services (36 months)
- European Project GAAS: Design and development of distributed Client/server Architectures for air traffic control systems
- EUROCONTROL Project PAMPAS: A preliminary approach to performance modelling and analysis of air traffic control systems
- EUROCONTROL Project EVAS: EATMS Validation Strategy

NATIONAL RESEARCH PROJECTS

I contributed actively in the following italian research projects:

- PRIN 2008 DASAP: Architetture Software Adattabili e Affidabili per Sistemi Pervasivi, duration: 24 months
- FIRB Programmi Strategici 2005: ART DECO (Adaptive InfRasTructures for DECentralized Organizations), duration: 36 months
- FIRB - PERF (2002 - 2006) Performance Evaluation of Complex Systems: Techniques, Methodologies and Tools, duration: 48 months

- PRIN 2001 SAHARA Software Architectures for Heterogeneous Access Infrastructures, duration: 24 months
- PRIN 1999 SALADIN: Software Architectures and Languages to Coordinate Mobile Distributed Components, duration: 24 months
- Certia-CERC Project Software Process Optimization and Collaborative Environments for Software V&V
- CNR Project Performance and Reliability Engineering of Distributed Databases
- ITALIAN MURST Project Performability V&V of Product and Processes in Software Engineering

EVALUATOR OF RESEARCH PROJECTS

- Reviewer of Research projects for the "Netherlands Organisation for Scientific Research" in 2009 and 2012
- Reviewer of Research projects for the "Fundao para a Cincia e a Tecnologia", Portugal in 2012
- Reviewer of Research projects for the DFG priority program SPP 1593/1, Germany, in 2012

EDITORIAL BOARDS

I am a member of the Editorial Board of:

- Journal of System and Software, Elsevier (2008-present).

CONFERENCE AND WORKSHOP ORGANIZATION

Program Chair and Organization Committees

- *In 2005* - Workshop organizer: NfC – Models for Non-functional Aspects of Component-Based Software, Models 2005
- *In 2007*
 - Co-organizer of GI-Dagstuhl-Seminar: "Modelling Contest: Common Component Modelling Example", August 2007
- *In 2008*
 - Program chair of: EUROMICRO Conference on Software Engineering and Advanced Applications (SEAA)
 - Workshop chair of IEEE ASE 2008: International Conference on Automated Software Engineering
 - Panel organizer: SOA and Quality Assurance at SEAA 2008
- *In 2009*
 - Program chair of QoSA 2009: Fifth International Conference on the Quality of Software Architectures
 - Co-organizer GI-Dagstuhl-Seminar: "Model-Driven Quality Prediction", 29.11.09 - 02.12.09
- *In 2010:*
 - Organization and PC co- chair of QUOVADIS: First International workshop on Quantitative Stochastic Models in the Verification and Design of Software Systems, Workshop at IEEE International Conference of Software Engineering (ICSE)
 - PC co-chair MOCS Model-based development, Components and Services Track Track at EUROMICRO SEAA

- *In 2011:*
 - PC co-chair of ACM WOSP/SIPEW ICPE International Conference on Performance Engineering
 - PC co-chair MOCS Model-based development, Components and Services Track Track at EUROMICRO SEAA
- *In 2012*
 - General-chair of: CompArch 2012, federated conference including CBSE (International ACM Sigsoft Symposium on Component Based Software Engineering), QoSA (International ACM Sigsoft Conference on the Quality of Software Architectures) and ISARCS (International ACM Sigsoft Symposium on Architecting Critical systems).
 - PC co-chair MOCS Model-based development, Components and Services Track
 - Editor of the Springer Journal Software and Systems Modeling theme issue on Performance Modeling
- *In 2013:*
 - TRACK chair ACM SAC Software Architecture: Theory, Technology, and Applications (SA-TTA)
- *In 2014*
 - TRACK chair ACM SAC Software Architecture: Theory, Technology, and Applications (SA-TTA)
- *In 2015*
 - Workshop co-chair at ICSE 2015

Steering Committees

I serve on the Steering Committee of the following conferences:

- ACM International Conference on Performance Engineering (ICPE)
- CompArch, federated conference including CBSE (International ACM Sigsoft Symposium on Component Based Software Engineering), QoSA (International ACM Sigsoft Conference on the Quality of Software Architectures) and WCOP (International Doctoral Symposium on Components and Architecture)
- member of SERENE: Software EngineerRing for rEsilieNt systems, ERCIM Working Group

Program Committee Membership

- *In 2002*
 - 3rd ACIS International Conference on Software Engineering, Artificial Intelligence, Networking and Parallel/Distributed Computing, SNPD 2002
 - Second ACIS Annual International Conference on Computer and Information Science (ICIS '02)
- *In 2004*
 - ICSE 2004 Doctoral Symposium
- *In 2005:*
 - ACM WOSP 2005: ACM International Workshop on software and performance
 - IEEE EUROMICRO 2005: Component-based software engineering track
 - First International Conference on the Quality of Software Architectures (QoSA 2005)

- *In 2006:*
 - EUROMICRO 2006: Component-based software engineering track
 - International Workshop on Web Services - Modeling and Testing (WS-MaTe)
 - ICSE- Workshop on Service Oriented Software Engineering (IW-SOSE'06)
 - EFTS 2006 International Workshop on Engineering of Fault Tolerant Systems
 - ISSA workshop ROSATEA 2006, The Role of Software Architecture for Testing and Analysis
 - Second International Conference on the Quality of Software Architectures (QoSA 2006)
 - 5th International Workshop on Critical Systems Development Using Modeling Languages in conjunction with MoDELS/UML 2006 (CSDUML 2006)
- *In 2007:*
 - ACM WOSP 2007: ACM International Workshop on software and performance
 - ESEC/FSE 2007: the joint European Software Engineering Conference and the ACM SIGSOFT Symposium on the Foundations of Software Engineering
 - ASE 2007: International Conference on Automated Software Engineering
 - EUROMICRO 2007: Component-based software engineering track
 - Rosatea workshop: The Role of Software Architecture for Testing and Analysis
 - Third International Conference on the Quality of Software Architectures (QoSA 2007)
 - IW-SOWSE07: 2nd International Workshop on Service Oriented Software Engineering
 - ICSOFT 2007: The 2nd International Conference on Software and Data Technologies,
- *In 2008:*
 - ACM WOSP 2008: ACM International Workshop on software and performance
 - Fourth International Conference on the Quality of Software Architectures (QoSA 2008)
 - ICSOFT 2008: The 3rd International Conference on Software and Data Technologies
 - ISEC 2008: First India Software Engineering Conference
 - SERA 2008: International Conference on Software Engineering Research, Management and Applications
 - AUTONOMICS 2008: Second International Conference on Autonomic Computing and Communication Systems
 - SERENE 2008: International Workshop on Software Engineering for REsilient SystEms
- *In 2009:*
 - ESEC/FSE 2009: the joint European Software Engineering Conference and the ACM SIGSOFT Symposium on the Foundations of Software Engineering
 - Workshop at ICSE 2009, IEEE, 31th International Conference on Software Engineering
 - EUROMICRO SEAA 2009: Service and Component-based software engineering track
 - PESOS 2009 Principles of Engineering Service Oriented Systems, in conjunction with the 31st Int. Conf. on Software Engineering (ICSE 2009)
 - QUASSO: International Workshop on the Quality of Service-oriented Software Systems
 - SERENE: International Workshop on Software Engineering for REsilient SystEms.

- *In 2010:*
 - ACM WOSP/SIPEW, ICPE Joint WOSP/SIPEW International Conference on Performance Engineering
 - CBSE: International Symposium on Component Based Software Engineering
 - QOSA: International Conference on the Quality of Software Architectures (QoSA 2010)
 - SC: International Conference on Software Composition
 - ICECCS International Conference on Engineering of Complex Computer Systems,
 - EPEW: 7th European Performance Engineering Workshop
 - SERENE: International Workshop on Software Engineering for RESilient SystEms.
 - FESCA International Workshop on Formal Engineering approaches to Software Components and Architectures
 - ViDAS. International workshop on Validation and Verification of Dynamic Software Systems
 - QUATIC: International Conference on the Quality of Information and Communications Technology
 - QUASOSS: International Workshop on the Quality of Service-oriented Software Systems
- *In 2011:*
 - QoSA 2011: International Conference on the Quality of Software Architectures
 - CBSE 2011: International Symposium on Component Based Software Engineering
 - ECSA 2011: European Conference on Software Architectures
 - ISSRE 2011: International Symposium on Software Reliability Engineering
 - SERENE: International Workshop on Software Engineering for RESilient SystEms
 - QUOVADIS 2011 Second International Workshop on Quantitative Models in the Verification/Validation and Design of Software Intensive Systems, ESEC/FSE 2011
 - ASAS 2011: Workshop on Assurances for Self-Adaptive Systems, ESEC/FSE 2011
 - ICECCS International Conference on Engineering of Complex Computer Systems
 - FESCA International Workshop on Formal Engineering approaches to Software Components and Architectures
- *In 2012:*
 - New Ideas and Emerging Results (NIER) track at ICSE 2012, the 34th International Conference on Software Engineering
 - Workshop track at ICSE 2012, the 34th International Conference on Software Engineering
 - ICPE 2012 ACM International Conference on Performance Engineering
 - ICECCS 2012 International Conference on Engineering of Complex Computer Systems
 - FESCA 2012 International Workshop on Formal Engineering approaches to Software Components and Architecture
 - CLOSER 2012 2nd International Conference on Cloud Computing and Services Science
 - MODELS 2012, ACM/IEEE 15th International Conference on Model-Driven Engineering Language and Systems
 - SC 2012, International Conference on Software Composition 2012, co-located with TOOLS 2012 Federated Conference
 - QoSA 2012: International Conference on the Quality of Software Architectures
 - CBSE 2012: International Symposium on Component Based Software Engineering
 - SERENE: International Workshop on Software Engineering for RESilient SystEms.

- *In 2013*

- FASE 2013: Fundamental Fundamental Approaches to Software Engineering, ETAPS 2013
- New Ideas and Emerging Results (NIER) track at 2013, the 35th International Conference on Software Engineering
- ICPE 2013: ACM International Conference on Performance Engineering
- ICECCS 2013 International Conference on Engineering of Complex Computer Systems
- FESCA 2013 International Workshop on Formal Engineering approaches to Software Components and Architecture
- MODELS 2013, ACM/IEEE 16th International Conference on Model-Driven Engineering Language and Systems
- ESEC/FSE 2013 Workshop selection
- QoSA 2013: International Conference on the Quality of Software Architectures
- CBSE 2013: International Symposium on Component Based Software Engineering
- ECSA 2013: European Conference on Software Architectures
- SERENE: International Workshop on Software Engineering for REsilient SystEms.

- *In 2014:*

- Workshop track at ICSE 2014, the 36th International Conference on Software Engineering
- ICPE 2014: ACM International Conference on Performance Engineering
- ECSA 2014: European Conference on Software Architectures
- MODELS 2014, ACM/IEEE 17th International Conference on Model-Driven Engineering Language and Systems
- ICECCS 2014 International Conference on Engineering of Complex Computer Systems
- FESCA 2014 International Workshop on Formal Engineering approaches to Software Components and Architecture
- QoSA 2014: International Conference on the Quality of Software Architectures
- CBSE 2014: International Symposium on Component Based Software Engineering
- ANT 2014: The 5th International Conference on Ambient Systems, Networks and Technologies
- HotTopiCS-2014: International Workshop on Hot Topics in Cloud services Scalability 2014
- SAeroCon2014: First Workshop on Software Architecture Erosion and Architectural Consistency
- SEAA 2014: 40th Euromicro Conference on Software Engineering and Advanced Applications
- WCOP 2014: International Doctoral Symposium on Components and Architecture

REFeree SERVICES

I regularly serve as a reviewer for the following journals:

- Performance Evaluation, Elsevier
- Journal of System and Software, Elsevier
- IEEE Transaction on Software Engineering,
- Software and System Modeling-Springer,

- ACM transactions on software engineering and methodology,
- IEEE Transactions on Dependable and Secure Systems,
- IEEE Transactions on Service Computing,
- Future Generation of Computer Systems, Elsevier
- Journal of Software: Evolution and Process, Wiley
- Computing Springer,
- Science of Computer Programming, Elsevier
- Information and Software Technology, Elsevier

Teaching activity

2013-2014

Ingegneria del Software II (5 credits) - Master of Science, Computer Engineering, Politecnico di Milano.

Distributed Software Development (5 credits) - Master of Science, Computer Engineering, Politecnico di Milano, Course offered in English and together with the University of Zagreb and Malarladen University, Vasteras, Sweden.

Impianti Informatici (5 credits) - Undergraduate Programme, Computer Engineering, Politecnico di Milano, Cremona Campus.

2012-2013

Ingegneria del Software II (5 credits) - Master of Science, Computer Engineering, Politecnico di Milano.

Distributed Software Development (5 credits) - Master of Science, Computer Engineering, Politecnico di Milano, Course offered in English and together with the University of Zagreb and Malarladen University, Vasteras, Sweden.

Impianti Informatici (5 credits) - Undergraduate Programme, Computer Engineering, Politecnico di Milano, Cremona Campus.

2011-2012

Ingegneria del Software II (5 credits) - Master of Science, Computer Engineering, Politecnico di Milano.

Impianti Informatici (5 credits) - Undergraduate Programme, Computer Engineering, Politecnico di Milano, Cremona Campus.

2010-2011

Ingegneria del Software II (5 credits) - Master of Science, Computer Engineering, Politecnico di Milano.

Impianti Informatici (5 credits) - Undergraduate Programme, Computer Engineering, Politecnico di Milano, Cremona Campus.

2009-2010

"Informatica A" (10 credits), Undergraduate Programme, Management and Production Engineering, Politecnico di Milano

Impianti Informatici (5 credits) - Undergraduate Programme, Computer Engineering, Politecnico di Milano, Cremona Campus.

2008-2009

"Informatica A" (10 credits), Undergraduate Programme, Management and Production Engineering, Politecnico di Milano

Impianti Informatici (5 credits) - Undergraduate Programme, Computer Engineering, Politecnico di Milano, Cremona Campus.

2007-2008

"Informatica A" (10 credits), Undergraduate Programme, Management and Production Engineering, Politecnico di Milano

"Informatica A" (10 credits), Undergraduate Programme, Management and Production Engineering, Politecnico di Milano, Cremona Campus.

2006-2007

"Informatica A" (10 credits), Undergraduate Programme, Management and Production Engineering, Politecnico di Milano

"Informatica A" (10 credits), Undergraduate Programme, Management and Production Engineering, Politecnico di Milano, Cremona Campus.

2005-2006

"Informatica A" (10 credits), Undergraduate Programme, Management and Production Engineering, Politecnico di Milano

2004-2005

Fondamenti di Informatica II, - Undergraduate Programme, Computer Engineering, University of Roma Tor Vergata

Fondamenti di Informatica I, (teaching assistant) - Undergraduate Programme, Computer Engineering, University of Roma Tor Vergata

2003-2004

Fondamenti di Informatica II, - Undergraduate Programme, Computer Engineering, University of Roma Tor Vergata

Fondamenti di Informatica I, (teaching assistant) - Undergraduate Programme, Computer Engineering, University of Roma Tor Vergata

Early validation of non-functional requirements in software systems, - PhD Course at University of Roma Tor Vergata

2002-2003

Impianti Informatici, - Undergraduate Programme, Computer Engineering, University of Roma Tor Vergata

Fondamenti di Informatica I, (teaching assistant) - Undergraduate Programme, Computer Engineering, University of Roma Tor Vergata

2001-2002

Impianti Informatici, - Undergraduate Programme, Computer Engineering, University of Roma Tor Vergata

Fondamenti di Informatica I, (teaching assistant) - Undergraduate Programme, Computer Engineering, University of Roma Tor Vergata

2000-2001

Impianti Informatici, - Undergraduate Programme, Computer Engineering, University of Roma Tor Vergata

Fondamenti di Informatica I, (teaching assistant) - Undergraduate Programme, Computer Engineering, University of Roma Tor Vergata

1999-2000

Impianti Informatici, (teaching assistant)- Undergraduate Programme, Computer Engineering, University of Roma Tor Vergata

Fondamenti di Informatica I, (teaching assistant) - Undergraduate Programme, Computer Engineering, University of Roma Tor Vergata

1998-1999

Impianti Informatici, (teaching assistant)- Undergraduate Programme, Computer Engineering, University of Roma Tor Vergata

Fondamenti di Informatica I, (teaching assistant) - Undergraduate Programme, Computer Engineering, University of Roma Tor Vergata

1997-1998

Impianti Informatici, (teaching assistant)- Undergraduate Programme, Computer Engineering, University of Roma Tor Vergata

Fondamenti di Informatica I, (teaching assistant) - Undergraduate Programme, Computer Engineering, University of Roma Tor Vergata

1990-1996

Simulazione, (teaching assistant)- Undergraduate Programme, Computer Engineering, University of Pisa

RESEARCH ADVISING

PhD Students Supervision

- Daniel Dubois (2007-2010), co-advisor, Self-organizing Methods and Models for Software Development
- Mauro Luigi Drago (2008-2011) co-advisor, Quality Driven Model Transformations for Feedback Provisioning

Graduate and Undergraduate Students Supervision

- Advisor of more than 30 undergraduate and Master students in Computer Engineering at Politecnico di Milano, 2006-Present
- Advisor of several Undergraduate and Master students in Computer Science at University of Roma Tor Vergata, 1997-2005

PHD EXTERNAL EXAMINER

- PhD Committee member in 2013 at University of Zaragoza, Spain, for the PhD defense of the candidate Diego Perez-Palacin discussing a thesis titled "Extra Functional Properties Evaluation of Self-managed Software Systems with Formal Methods", Advisor Prof. Jose' Merseguer
- PhD Committee member in 2013 at University of Calgary, Canada, for the PhD defense of the candidate Anas Youssef discussing a thesis titled "Burstiness and Uncertainty Aware Service Level Planning for Enterprise Clouds", Advisor Dr Diwakar Krishnamurthy

- External reviewer in 2013 for the habilitation as Associate Professor of Tomas Bures, Charles University, Prague, Czeck Republic
- External reviewer 2012 for the PhD thesis of the candidate Indika Meedeniya titled "Architecture Optimisation of Embedded Systems under Uncertainty in Probabilistic Reliability Evaluation Model Parameters", Advisor Prof. Lars Grunske, Swiburne University, Australia
- PhD Committee member in 2012 at University of Lisbona, Portugal, for the PhD defense of the candidate Liliana Rosa discussing a thesis titled "Self-management of Systems Built from Adaptable Components", Advisor Prof. Luis Rodrigues, co-advisors: Prof. Antonia Lopes
- PhD Committee member in 2012 at Malardalen University, Sweden, for the PhD defense of the candidate Severine Santilles discussing a thesis titled "Managing Extra-Functional Properties in Component-Based Development of Embedded Systems", Advisor Prof. Ivica Crnkovic, co-advisors: Dr. Jan Carlsson, Prof. Hans Hansson
- PhD Committee member in 2010 at Malardalen University, Sweden, for the PhD defense of the candidate Kurt Wallnau discussing a thesis titled "Predictability By Construction: Working the Architecture/Program Seam", Advisor Prof. Ivica Crnkovic, co-advisors: Magnus Larsson, Hans Hansson
