Monday, December 3rd, 2012

Dear Sir/Madam,

This letter confirms that Dr. Marco D. Santambrogio is participating as co-principal investigator since the start (on March 1st, 2010) of the Swiss National Science Foundation project titled “Dynamically Adaptive Architectures for Nomadic Embedded Systems” (ref. FN511647), where I serve as principal investigator.

During this period, Dr. Santambrogio has been very active in cooperating with several research associates and graduate students at the embedded systems laboratory (ESL) of EPFL where we lead this project. Thus, it is planned the involvement of Dr. Santambrogio until the end of the project on February 28th, 2013 and I look forward to having the opportunity to having possible follow-up research cooperations in the related areas of the project even beyond the current project.

Yours Faithfully,

Prof. David Atienza Alonso,
Director of the Embedded Systems Laboratory (ESL) at ÉPF Lausanne,
EPFL/STI/IEL/ESL, ELG 131, Station 11, CH-1015 Switzerland.
